Comments: Please enter my support for the project listed above. I am a direct abutter to the project. I have no financial interest in the project as proposed. I do believe the request for a full EIR is beyond reason given the limited nature of the proposed impacts. I have personal knowledge that the Fructman objections to this proposal are strictly limited to their desire to limit the use of the existing driveway across their property. Further, as the former owner of the Fructman property(I sold to them some years ago) they were fully aware at the time of their purchase that the driveway would service other residences at the time they purchased their lot.

Please keep me informed of the progress of the application by Gorda Trust. Thank you, Jeff Madison
