Jim:

The purpose of this e-mail is to memorialize our recent discussion regarding proposed IRA activities at Eagle Gas Station. Due to past noncompliance issues at the Site and the problems encountered conducting the last orally approved response actions (construction of the interceptor trench), the Department will not approve an oral IRA Modification to conduct a pump test, vac LNAPL out of monitoring wells and continue passive LNAPL recovery from select monitoring wells. A written IRA Plan Modification, prepared in accordance with 310 CMR 40.0424, detailing all proposed activities must be submitted and approved by the Department prior to conducting the proposed response actions.

Please contact me if you have any questions.

-Cynthia.
