RE: *Immediate Response Action Plan Modification Nos. 3 and 4;*
131 Main Street, Carver (the Site); RTN 4-17582; NON-SE-03-3T-103

Dear Mr. Hobill:

On behalf of Eagle Gas, Inc., Decoulos & Company would like to clarify our understanding of IRA Plan Modifications submitted to the Department on January 7, 2005 (IRA Mod No. 3) and January 18, 2005 (IRA Mod No. 4).

We recognize that IRA Mod No. 3 requires additional data to justify various design controls (i.e. the sizing of the activated carbon vessels, the changeout period of the activated carbon vessels, the estimation of permeability and flow rates, etc.). Accordingly, we request that the Department stay the approval of IRA Mod No. 3 until the initial actions proposed in IRA Mod No. 4 are complete.

Based upon testing scheduled for next week as described in IRA Mod No. 4, we estimate that the collected pump test data and amended design for IRA Mod No. 3 will be filed with your office on February 2, 2005. We will then wait at least seven days (until February 10, 2005) to receive written approval from the Department on IRA Mod No. 3. No work proposed in IRA Mod No. 3 shall be conducted until this time.

Please feel free to call or email if you have any questions or concerns. Thank you.

Very truly yours,

James J. Decoulos, PE, LSP
